

Full-stack developer and CS engineering student at IIT (BHU) Varanasi. I turn real-world problems into impactful digital products — from sleek React/Next.js frontends to robust Node.js backends — with a strong foundation in DSA and a big-tech internship measuring production-scale performance.

EXPERIENCE

Software Engineering Intern — Microsoft · M365 Copilot2025

- Owned an end-to-end performance investigation of the ESS agent, measuring, diagnosing and attributing latency across mobile and web at production scale.
- Onboarded a dynamic agent (no static ID) onto the CIE performance dashboard via a novel schema-name filter over the Custom Usage Dataset (CUD); shipped a reference query the platform team adopted.
- Correlated telemetry across three data sources on the same conversation turns, proving first-token streaming was healthy and pinpointing the connected-agent path as the true bottleneck.
- Decomposed connected-agent latency into measured spans (plan-creation, universal search, flow) and drove a data-backed recommendation to migrate ESS to the new MCS experience.

SELECTED PROJECTS

NotesMania — live

Platform for students to organize and share notes, replacing unorganized WhatsApp groups. Next.js · MongoDB.

Nexus — live

Productivity platform to manage tasks, deadlines and content efficiently. React · Node.js · Express.

AI Chat Application — live

AI-powered chat with group chat, audio messages, attachments and context-aware follow-ups.

Better Call Saul — live

Full-stack platform to book appointments with lawyers and let advocates showcase expertise. GraphQL · MongoDB.

SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, ShadCN UI, Framer Motion, Three.js
Backend: Node.js, Express.js, GraphQL, REST APIs, Socket.IO, Firebase
Data & Cloud: MongoDB, PostgreSQL, Vercel, KQL, Cloud Telemetry, Git
Foundations: C++, Data Structures & Algorithms, Competitive Programming, System Design

EDUCATION

Indian Institute of Technology (BHU), Varanasi2023 — Present

B.Tech, Engineering — coursework in DSA, systems and full-stack development.
